EXPERIENCE

2022-2025 **Symbotic (acquired Walmart ASR in January 2025) - Andover, MA, USA**

Software Engineer II - 2024 - 2025

Software Engineer I - 2023 - 2024

SDET I - 2022-2023

- Implemented core backend logic in Java (Spring) for the company's primary emulation framework, developing features and fixing bugs
- Built and maintained an internal web app (Svelte, Kubernetes, Gitlab API) used company-wide to deploy, manage, and test versioned releases of the company product, significantly improving release management and release reliability
- Reshaped CI/CD pipeline of emulation team, introducing trunk-based development and greatly reducing merge-to-deploy times
- Automated documentation and API client generation pipelines, integrating them into automated testing workflows and providing direct, auto-updated resources for emulation and SQA teams
- Maintained Helm charts for emulation and core product, ensuring deployment consistency
- Diagnosed cross-team issues via Azure Data Explorer, reducing testing downtime and discovering bugs
- Built and deployed Docker containers, orchestrating them with Gitlab CI/CD and Kubernetes
- Collaborated closely with developers, PMs, and QAs in an Agile development environment to deliver adaptable, compatible, and high-quality emulation software

EDUCATION

2018-2022 **Tufts University - Medford, MA, USA**

Bachelor of Arts in Computer Science

- Graduated *magna cum laude*
- GPA: 3.71, Dean's List
- Coursework: Algorithms, Data Structures, Web Development, Network Security, Cybersecurity, Machine Structure & Programming, Theory of Computation (TA), Game Development, Discrete Mathematics, Linear Algebra

PROJECTS

2019 **Shield Man Unity Game**

- Created a sci-fi, action platformer on Unity using C#, gathering a team of programmers and artists
- Programmed stages and projectile behaviors & movements
- Worked as the creative lead and level designer, directing the game design and visual aesthetic

2020-2021 **JumboCode - Animal Aid**

- Used Django to build a website and scheduling algorithm for the Tufts Animal Aid Club
- Worked on both front-end and back-end using Python, HTML, CSS, with tools like Bootstrap, PostgreSQL, and Heroku

SKILLS

- **Programming Languages:** Python, Java, JavaScript, C++, C, C#, HTML, CSS, SQL, Solidity
- **Tools:** Spring, Kubernetes, Docker, Helm, Gitlab CI/CD, Pytest, Svelte, React, MongoDB, PostgreSQL, Slack, Jira, Unity
- **Interests:** Backend Development, Web Development, Video Game Development, Storytelling & Writing
